AMANDA MA

@ amanda_ma98@berkeley.edu +1 (415) 609-4858 Portfolio: https://mandiema.github.io

EXPERIENCE

Software Engineer Intern
Embark Trucks
Jan 2021 – Apr 2021 San Francisco, CA

- Perception Team – Semantic Image Segmentation
- Built and maintained pipelines and benchmarks to improve model performance

Applied Machine Learning Intensive, Fellow
Google, Inc.
May 2019 - Aug 2019 Decatur, GA

- Selected from 600+ applicants as one of a 18-person cohort to take part in a ten-week project-based machine learning course by Google
- Analyzed and cleaned visual data; learned to differentiate between machine learning models, diagnose modeling issues, and adjust input data accordingly
- Attended weekly professional development workshops covering technical presentation skills, communication, and project management

Data Science Intern
C. Light Technologies, Inc.
May 2020 - June 2020 San Francisco, CA

- Implemented ordinal logistic regression and dimensionality reduction techniques to enable monitoring and prognosis of multiple sclerosis

Data Consulting Project Manager
Student Association for Applied Statistics, UC Berkeley
Jan 2020 - May 2020 Berkeley, CA

- Recruited and managed (logistics, technical advising) a team of 7 students on a data consulting project with PinXuan Intelligence, a computer vision startup based in China
- Collaboratively implemented deep learning models for fine-grained image classification

Data Consultant
Student Association for Applied Statistics, UC Berkeley
Sept 2019 - Dec 2019 Berkeley, CA

- Collaborated with Trace Data (acquired by Netskope) to apply natural language processing and topic modeling techniques towards understanding JSON corpora

Insights & Analytics Committee Director
Student Association for Applied Statistics, UC Berkeley
May 2020 - Dec 2020 Berkeley, CA

- Lead a team of 10+ data consultants through managing client-work and delivering weekly technical workshops on machine learning fundamentals

Calculus Teaching Assistant
Mills College
Aug 2017 - May 2018 Oakland, CA

- Lectured Math47/48L, weekly calculus discussion courses, to 30+ students
- Graded homework submissions via. Gradescope, consistently providing feedback on assignments before established deadlines
- 40+ hours of one-on-one tutoring for 12 calculus students

EDUCATION

Bachelor of Arts, Data Science
Univeristy of California, Berkeley
Aug 2019 - Aug 2021

TECHNICAL SKILLS

- Python Programming (primary)

Tensorflow | Keras | Pandas | Numpy | Matplotlib | Seaborn | OpenCV | Scikit-learn | Scipy

- R, Java, SQL, Git, HTML/CSS, Excel

COURSEWORK

- CS61A Structure & Interpretation of Computer Programs
- CS61B Data Structures & Algorithms
- CS61C Machine Structures
- CS186 Database Systems
- CS188 Artificial Intelligence
- CS189 Machine Learning
- EECS127 Optimization Models
- Math110 Linear Algebra
- Data8 Foundations of Data Science
- Data100 Pricinples & Techniqies of DS
- Data144 Data Mining & Analytics
- Stat133 Concepts in Computing
- Stat135 Concepts of Statistics
- Stat140 Probability for Data Science

PROJECTS

- **Creating Tensorflow, Keras Tutorial**
  CS189 Final Project
- **Humerus Fractures: Image Classification**
  Correlation One: DS4A Summit Project
- **Multi-Class Image Classification**
  Data100 Graduate Final Project
- **Video Object Recognition**
  Google ML Intensive Project

SELF-LEARNING

- **Neural Networks & Deep Learning; Improving Deep Neural Networks; Structuring Machine Learning Projects**
  deeplearning.ai, 2019
- **Intro. Machine Learning in Production**
  deeplearning.ai, 2021
- **NLP with Classification & Vector Spaces**
  deeplearning.ai, 2021
